**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Persistent rain will result in very wet underfoot conditions and high water courses, with crossings potentially hazardous. Some paths and access roads may also be flooded. Wind and rain will enhance chill affect.

Forecast for Saturday 04 Nov 2023

Weather: A largely dull day with light overnight rain turning to patchy drizzle through the morning, with Ben Alder in the southwest seeing the best chance of dry weather. Mostly dry in the afternoon, perhaps some bright spells developing, best chance of these in the south. Dry but cloudy overnight.

Maximum wind: Light and variable.

Chance of cloud-free hill tops above 800m: 20-40% in the morning, 50-60% in the afternoon. Best chance on the south.

Low cloud and visibility: Most likely poor visibility to start with persistent cloud down to around 400-600m. There is a chance that this will thin and break from the south through the day.

Temperature: **Glens:** Plus 4 Celsius rising to 7 Celsius.
At 800m: Plus 2 or 3 Celsius.
Freezing level: 1200m.
